## IQ Satellite

The new touch terminal designed to make your work easier

This additional device to the IQ cash register is designed to be used directly in the room, placed wherever you prefer or installed on the wall thanks to its support

# IQ Satellite

SATELLITE is the brand new Labware touch terminal designed to make work easier in your restaurant, pizzeria, bar, or gelato shop. This device, which works with BASIQ, is designed to be used directly on the floor, placed wherever you prefer, or mounted on the wall thanks to its support (optional for Satellite 15"). It is the ideal solution for taking orders in separate dining areas such as a dehors, terrace, or wherever an additional workstation is needed to manage floor activities and order placement, offering maximum versatility.

## IQ SATELLITE IS DIRECTLY CONNECTED TO THE CASH REGISTER

SATELLITE needs to be connected as a CLIENT to a local network with IQ 10 or IQ 15, which will act as a server for the device. Orders placed with SATELLITE are sent directly to IQ, which manages all printouts towards the preparation centres. Dine-in, takeaway, or delivery orders are shared and updated in real time with all systems in the network.

## MAXIMUM COMPATIBILITY WITH ALL LABWARE DEVICES

SATELLITE supplements your IQ and is automatically synchronised with all Labware devices. It can easily be integrated with NANO, QUICK MENU, KDS and above all with DOT USB, which thus becomes your service printer for delivering customer bills to the tables.

The simplified configuration means SATELLITE can be installed in just a few clicks.

## WITH SMART TDE WORKING ON SATELLITE IS SIMPLE AND IMMEDIATE

The simplicity of SATELLITE is supported by the frontend application, SmartTDE, which is the same as the one at the register. This makes learning how to use SATELLITE simple and easy for floor staff. SmartTDE ensures an efficient dialogue between dining areas, managing priorities and preventing simultaneous access to the same account by multiple operators, even in the presence of NANO or QUICK MENU handhelds.

## OPERATOR KEYS FOR FAST, PRACTICAL, AND UNIQUE IDENTIFICATION

SATELLITE can be shared among floor staff to place orders with utmost simplicity. Thanks to the SATELLITE operator key reader, identification is fast, easy, and unique, with operators simply needing to rest the magnetic key on the reader to log in. Logout is just as easy by removing the key, after which SATELLITE is ready to receive the next order from a different operator.

SATELLITE connects to the local network via a LAN cable or WI-FI (optional kit)

## FEWER REGISTER OPERATIONS THANKS TO ACCESS TO 4ORDER FROM SATELLITE

SATELLITE helps you reduce the number of operations that need to be managed from the register. Access 4Order from SATELLITE and manage takeaway, delivery, dine-in orders and bookings.

**Q Satellite 10**

**Q Satellite 15**

- ✓ **Order placement and sending of commands to the relative production centres**
- ✓ **Integration with 4Order to manage: Takeaway • Delivery • Bookings • School • Work Lunch • Dine-in**
